INDUSTRY ORIENTED SOFTWARE TRAINING

Concept Solutions

Who We Are

Concept Solutions is a Software Development and Training company that offers custom software development services on diverse technology platforms, like Microsoft, Java, PHP and Mobile. With rich and wide range of experience of 13 years in software development and uncompromising quality standards, we offer utmost qualitative, on-time and cost-effective software solutions.

Our Services

- Software Development
- Mobile Application Development
- Web Designing
- IT Internship Training

Concept Solutions offer training on latest technologies in all domain as required in the job market. Freshers are groomed and polished to meet the requirements of the corporate world. We offer job-oriented programs, staffing solutions and campus recruitment. We act as incubator where they could learn what the industry needs. We assist the students to achieve global standards of efficiency and make sure that they are productive from the day one. We use a relatively simple end-to-end process to develop our training programs. The key to the success of this approach is that the programs are comprehensive and are executed by the best of faculty with the prime focus on use-case driven training. The focus on use-case driven training, where the emphasis is on practical rather than theoretical knowledge itself is a game-changer. We collaborate with our clients at each step to ensure that the training program is well received by the intended audience and will meet / exceed the organization's desired outcomes.

As one of the fastest growing training providers in India, we believe in providing solutions based on leading edge techniques, supported by scientific facts and background, delivered professionally by our certified and accredited trainers.

Internship Training Program

Considering the immense opportunities that the corporate world has, the gap between the system and the industry needs to be bridged. Our internship program gives you an industry exposure while in parallel, updating you with latest technologies for best placement options. We offer the students with hands-on-learning experience outside the standard class room settings and also serve as a bridge between the traditional academic system and the professional world.

Internships offer the potential for valuable learning opportunities outside the standard classroom setting and also serve as a bridge between the traditional academic settings and the professional world to which the student aspires. Internship offers the opportunity for the beginning of lifelong learning for students, therefore choose an internship that will enhance your learning experience.

We offer Internship Training to Final Semester/year and pass out students who are still waiting for their first job and looking forward to get industry exposure with current projects and company environment.

Our internship program build your knowledge to a professional level, which starts from the very basics of programing languages and Software Development and also get exposure to real time projects under the direction of experienced Faculties. Students stepping out from Concept Solutions after completing the internship training will have an experience background in real time working environment and they are capable to work from the very next day in any corporate company with confidence. Course certificate and experience certificate is provided for those who successfully complete the course.

Modules

Module 1 : IT SKILL DEVELOPMENT

- Presentation Layer (IDE & Client side Scripting)
- Application Layer (language fundaments and concepts)
- Data Layer (Database design, Normalization and Query building)

Module 2: CORPORATE EXPOSURE

- Slack (collaboration tool)
- Jira (Project Tracking System)
- MS Visio | Balsamiq (Designing | Wire framing Tools)
- Git | SVN (Source Code Repository | Version Control System)
- Jenkins (Continuous integration/release management)

Module 3 : PRE PLACEMENT TRAINING

- Assertiveness
- Communication Skills
- Corporate Etiquettes
- Creativity and Innovation
- Interview Skills
- Personality Development
- Stress Management
- Team building

Module 4 : PROJECT DEVELOPMENT

- Project Document preparation (SRS | Design |Test Case | Report)
- Live coding with mentors from industry
- Testing with Local Server
- Deploy the project in Live Server

Module 5 : PROFESSIONAL MEETUP

- Workshops
- Seminars in cutting edge technologies
- Forkross (Food Festival)
- Tech Talks from industry experts
- Festival and Celebrations

Module 6 : PLACEMENT SUPPORT

- Resume Building
- Reputation Management
- Mock Interviews
- Sending Resumes to companies.
- Scheduling interviews.
- Update the feedback.
- Orientation program to join client organization.

Technology Streams

Stream 1 : Java / J2EE

JAVA | J2EE | SERVLETS | JSP | SWING | JDBC | MY SQL

HTML 5 |CSS | JAVA SCRIPT | AJAX | JQUERY |Angular JS | Bootstrap

ECLIPSE | Net Beans | Dream Viewer | TOMCAT

Stream 2 : Dot Net

C#.NET | ASP.NET | ADO.NET | MVC | MS SQL

HTML 5 |CSS | JAVA SCRIPT | AJAX | JQUERY |Angular JS | Bootstrap

Visual Studio | Dream Viewer | IIS

Stream 3 : PHP MySQL

PHP | WORD PRESS | CODE IGNITER | MY SQL

HTML 5 |CSS | JAVA SCRIPT | AJAX | JQUERY |Angular JS | Bootstrap

Dream Viewer | Apache

Stream 4 : Android SQLite

JAVA | ANDROID | SERVLETS | JDBC | SQLITE

REST API | Web Services |Google API | Firebase

Android Studio | SQLite Workbench

Concept Solutions

Program Highlights

What you Learn ?

- CORE
    - Language fundamentals
    - Database tier (Advanced SQL commands)
    - Stored Procedure | Triggers

- ADVANCED
    - Web based Architecture
    - Web application Development
    - Web Designing Tools and Software (HTML | Java Script |CSS)
    - IDEs

- EXPERT
    - Frameworks
    - CMS
    - Bootstrap
    - jQuery | Ajax
    - AngularJS

Training Environment

- Industry based professional software developing environment
- Free Wi Fi at Training center
- Server and Client based working environment
- Best IT Infrastructure
- Professional Employee Hierarchy based working structure

Professional Grooming

- Company ID Card
- Company Email ID
- Company Business Card
- Profile with Junior Developer

Teaching Learning Methodology

- Activity & Assignment based Learning
- On-Job Training (Live real time modules)
- Live Hosting
- Training by Industry Experienced Mentors

Concept Solutions

Course outline

Course Outline

- 1 Live project (developed and deployed in live server)
- 5 + small application developing experience
- 10 + years industry experienced mentors
- 20 Trainees maximum in a batch
- 50 + Evaluation Process
- 100 + Hands-on assignments
- 200 + hours Live Mentorship
- 500 + hours Course duration

Key Outcomes

- Experience the Live Software Developing Environment
- Understanding of Presentation, Application and Data Layers of a software
- Learn and practice the core and advanced concepts of programing
- Familiar with various tools used in various phases of software development
- Ability to develop and deploy live software
- Prepares you to build communication skills and personality
- Enables you to network with professionals
- Understand current Technology and Trends in Industry
- Enjoy a professional job in MNC

Duration and Timings

- 3 Months (500 hours)
- 10.00 am to 4.00 pm
- Monday to Friday
