

## INFORMATICA 9.6

**Duration: 40 hours**

**Pre Requisite: Oracle SQL & PL/SQL.**

---

### COURSE CONTENTS:

Introduction to Informatica as an ETL tool  
Informatica Architecture  
Installation & Creating Domain & Repository  
Administration Activities

#### Basic Definitions

Informatica Tools and their roles  
Designer  
Introduction to designer tools  
Mapping designer  
Mapplet designer

#### Transformation Developer

Source Analyzer  
Warehouse designer  
Customizing designer default Options and using Business names

Working with sources  
Working with relational sources  
Working with flat file sources

-----*Redefining Software & Educational Services.*

**Gloedge** Technologies (P) Ltd.,

# 847,7th Cross, 10 th Main, MICO Layout, B.T.M 2nd Stage, Bangalore-560-076,

Call: +91 80 41133336, +91 9945282834, Web : [www.gloedge.com](http://www.gloedge.com) E-Mail: [training@gloedge.com](mailto:training@gloedge.com)

## Importing a fixed width and a delimited flat file

Importing COBOL Sources

Working with targets

Creating Reusable transformations

Promoting a standard transformation

Creating instances of Reusable transformations

## Adding Reusable transformations to mappings

Modifying a Reusable transformation

Reverting to original reusable transformation

Understanding the various transformations

## Source Qualifier Transformation

Aggregate transformation

Expression transformation

Filter transformation

## Joiner transformation

Lookup transformation

Normalizer transformation

Update Strategy transformation

Rank transformation

## Sequence Generator transformation

Sorter Transformation

Mapplets

## Overview

Mapplet Components  
Mapplet input  
Mapplet Output  
Developing a Mapplet  
Working with Mapplets  
Using Mapplets in mappings

## Workflow Manager

Understanding the Server Architecture  
Configuring and Using the Workflow Manager  
Working with Workflows,  
Tasks and Worklets

## Working with Sessions, Sources and targets

Log files,  
Session Parameters,  
Scheduling  
Sending Email, FTP,  
Incremental aggregation  
Session caches,  
Performance Tuning

## **UNIQUE FEATURES**

Parameter file creations  
Unix basic commands  
Real Time scenarios
